

Overview of the Profiling Arrangements

Who should attend? This course will be of particular interest to customers in a role relating to Supplier Volume Allocation who want to know about profiling. The course can be tailored to either a high level overview or a detailed explanation of the profiling calculations.

Course Overview: this course will cover:

- What is Load Profiling?
- The history of Load Profiling;
- The Profile Classes: what are they and why were they chosen?
- A sample design;
- Regression analysis;
- Building a profile 'shape';
- How Profiles are used in Settlement;
- Sources of error;
- Line Loss Factors; and
- Group Correction Factors.

Course Objectives: at the end of the course, delegates will understand:

- What Load Profile are and how the Profile Administrator constructs them;
- How the load profiles are used by the Supplier Volume Allocation Agent and Supplier Agents;
- What the sources of Profiling Data are; and
- How profiling error is corrected.

Duration: 2 hours

Date: on demand

Location: [ELEXON](#) or customers' offices

Cost: this course is free of charge to BSC Parties and BSC Party Agents. ELEXON may charge other organisations for training services.
