

Overview of the ECVAA Web Service (EWS)

November 2011. Version 3.0

The ECVAA Web Service (EWS) is a web-based reporting and submission tool that provides users with Energy Contract Volume Notification (ECVN) and Metered Volume Reallocation Notification (MVRN) data. The EWS also enables users to submit contracts (ECVNs & MVRNs) and produce reports through an easy- to- use, secure web interface.

If you need help, or more information, please email bscservicedesk@logica.com

Please note that the EWS should not be considered a substitute for having access to facilities that enable communication with the BSC Central Systems. If you have any queries about this, please contact the BSC Service Desk.

Who can use the EWS?

This service is available to all BSC Parties, Metered Volume Reallocation Notification Agents (MVRNAs) and Energy Contract Volume Notification Agents (ECVNAs).

What are the key benefits of EWS?

- Provides you with an overview of all ECVN and MVRN contracts that are in the ECVAA system for your Party ID over a seven- day period.
- Allows BSC Parties to view all contracts for which they are a counter party.
- Clearly displays ECVN and MRVN contract data separated by Production and Consumption accounts, with details of the latest transaction displayed as a point of reference.
- Alerts you to update expired data.
- Allows you to filter data by:
 - Counterparty;
 - Settlement Day; or
 - Settlement Period.

And specifically for MVRN Data by:

- Balancing Mechanisms (BM) Units; or
- BSC Party.
- Supports the dual notification method of submitting contracts and highlights any mismatch in contracts submitted by highlighting the data in colour.

Visit our website:
www.elexon.co.uk

What are the specific benefits for ECVNAs and MVRNAs?

- Allows ECVNAs and MVRNAs to create and submit ECVNs and MVRNs to the ECVA system.
- Provides access to standard forms to ensure that ECVNs and MVRNs are submitted which meet the IDD specifications.
- Auto-populates fields in new contract forms based on the ECVNA or MVRNA Authorisation ID (ID registered in ECVA which represents the relationship between two counterparties).
- Provides acknowledgments from the ECVA system back to the EWS web browser.
- Allows ECVNAs and MVRNAs to copy or edit previous notifications to save time.
- Provides a count of all contracts submitted per ECVNA or MVRNA Authorisation ID.

What does it look like?

Is the EWS Secure?

Yes. The EWS uses XSec encryption for the generation of Login Credential Files (LCFs) to authenticate users.

Can I use EWS as well as the standard FTP submission method?

Yes, you can submit contracts using both EWS and standard FTP submission without affecting sequence numbers.

How much does it cost?

It's free to BSC Parties, ECVNAs & MVRNAs.

Can I order EWS before I have completed the Market Entry process?

No. Your market role must be registered in BSC Central Systems via [BSCP65](#) and [BSCP71](#) before you can order the service.

How do I order the EWS?

Email bscservicedesk@logica.com requesting access to the EWS.

Once we have received and processed your order we will send you an email which explains how you can download the XSec v3.0 User Guide from the Neta Exchange Server. The user guide contains instructions on how to create Login Credentials files using the XSec Manager Graphical User Interface.

Need more information?

For more information please contact the BSC Service Desk at bscservicedesk@logica.com or call 0870 010 6950.
